

## Gonzaga Faith and Reason Institute Annual Spring Lecture Series

### Science and the God of Abraham

# Fr. Robert Spitzer, S.J.

Gonzaga President 1998-2009

EWTN Radio Presenter

World renowned academic

*Evidence for God from Contemporary Physics, etc*

Wednesday 4<sup>th</sup> Feb, 2026, 7 PM Globe Room Cataldo Hall, Gonzaga

## “The Scientific Investigation of Miracles Concerning the Holy Eucharist and the Appearance of Mary”

Today many are under the impression that science and miracles are incompatible, indicating that miracles are beyond the pale. However, recent scientific investigations show precisely the opposite. Fr. Spitzer will examine the scientific investigations of three Eucharistic miracles (Buenos Aires 1996, Tixtla Mexico 2006, and Sokolka Poland 2008) as well as the recent scientific investigation of the tilma of Guadalupe, the Miracle of the Sun at Fatima, and four extraordinary cures at Lourdes.

Thursday 5<sup>th</sup> Feb, 2026, 7 PM Ballroom Third floor, Hemmingson, Gonzaga

## “Can a Reasonable and Responsible Case be Made for Angels and Demons?”

The topic of angels and demons is often treated as mythical and cartoonish. Fr. Spitzer will examine recent evidence for angels and demons reported in medical studies of near death experiences and deathbed visions as well as corroborated reports of angelic appearances and demonic possessions. These studies show the likelihood that we are living in a world that goes beyond the merely physical and concrete—a world in which spiritual friends and adversaries are acting interiorly and exteriorly.
