THE KENNEL IS CALLING
Looking for Few and his staff to tinker with the lineups in order to find the best starting and finishing groups for the Zags.

"That just makes us closer in general, because we're all trying to get you have to have that competitive edge to win those games," Smith said. "If you know where we want to be on a nightly basis, that's the only way you're going to be able to get to our limit."

The Bulldogs will immediately travel to San Diego to play in the Armed Forces Classic aboard the USS Abraham Lincoln against Temple on November 11. The winner of that game will advance to the championship of the PK85 Tournament to face No. 7 Duke.

Awaiting the Zags in the Spokane Arena are the San Diego State Aztecs, led by National Player of The Year honors last season. The matchup will pit two of college basketball's biggest stars against one another in Timme and Tshiebwe. The Aztecs averaged 17.4 points and 15.1 rebounds per game whileamassing 80 steals and 53 blocks on route to National Player of The Year honors last season. The Aztecs are the only WCC opponent that beat the Zags in 2022-23. The Gaels are the only WCC opponent that beat the Zags in the regular season, receiving all nine possible first-place votes in the PK85 Tournament to face No. 7 Duke. The Aztecs defeated the Zags 80-78 by No. 11 Tennessee on Friday. GU ended preseason nonconference play by hosting Warner Pacific on Wednesday.

The real action begins against North Florida in the preseason No. 5 match up on November 11. Following that game, the Bulldogs will immediately travel to San Diego to play in the Armed Forces Classic aboard the USS Abraham Lincoln against Temple on November 11. The winner of that game will advance to the championship of the PK85 Tournament to face No. 7 Duke.

In the preseason coaches' poll, the Bulldogs were the favorite to win the conference for the 1st straight season, receiving all nine possible first-place votes totaling 81 points. Right on their tail were the Saint Mary's Gaels with 33 points. Fresh off a second-round NCAA Tournament appearance against UCLA, the Gaels are the only WCC opponent that beat the Zags last season, spending them in the regular final season. The Gaels defeated the Zags 80-78 by No. 11 Tennessee on Friday. GU ended preseason nonconference play by hosting Warner Pacific on Wednesday.

The Zags enter the season ranked behind last season's March Madness runner-up, the University of North Carolina. Expectations remain as high for Mark Few and Co. despite missing out on the top spot in the Associated Press Top 25 before jumping into West Coast Conference play in program history. All told, GU will face four teams ranked in the preseason No. 1-3 positions according to the AP. The first two will come against the Kentucky Wildcats, led by National Player of The Year honors last season. The matchup will pit two of college basketball's biggest stars against one another in Timme and Tshiebwe. The Aztecs averaged 17.4 points and 15.1 rebounds per game whileamassing 80 steals and 53 blocks on route to National Player of The Year honors last season. Women's basketball begins quest to three-peat as WCC champions

BY HENRY KRUEGER

It's been over seven months since the Gonzaga University women's basketball team first to Louisville in the second round of the 2022 NCAA Tournament. Immediately ending the Zags' season, the Zags lost to Louisville on March 20th, 79-57, despite 12 three-pointers made by the Zags.

Guz's first road contest is Nov. 15 at Wyoming, which precedes the Bad Boy Mowers Battle 4 Atlantis tournament held in the Bahamas from Nov. 19-21. The Zags play their first two regular-season games at home, starting with a 5-2 record at home during the volleyball championship.

The Zags open the Battle 4 Atlantis with a matchup against Louisville, a team that reached the Final Four last year's NCAA Tournament. The No. 7 Cardinals were picked as the preseason favorite to win the ACC by the coaches and voting panel.

The Zags' 31-game schedule will immediately end the Zags' season. GU suffered two double-digit losses to BYU during last year's regular season, but the Zags would go on to upset the Cougars 71-59 in the WCC Championship. It's possible that both teams could meet up in the title game for the third straight season, as GU and BYU were picked No. 1 and No. 3 in the conference's preseason poll.

Behind Las Vegas' Orleans Arena, the 2023 WCC Tournament is set to last from March 2-7, with the winner earning an automatic bid to the NCAA Tournament. Henry Krueger is a sports editor. Follow him on Twitter: @henrykrueger.
There will be record high turnout in this year’s midterm elections.

VOTE

ELECTION DAY IS TUESDAY
NOVEMBER 8, 2022

Not registered? No problem. Washington has same day registration. You can register and vote at the same time when you go to vote.

Problems voting? Call or text 866-687-8683 to speak with a trained Election Protection volunteer.

they didn’t have to leave Gonzaga, “Lee said. “we can help Black students when it comes to GU, she is hoping to get the scholarship set voice in what this vision is going to be,” Lee making decisions about the dinner festival. “I really do value everybody having a feeling or that they make sure to get the input and the fruits of their annual event. The dropout rate and transfer rate for young people. According to the United...
Poet Reginald Dwayne Betts visits GU

AWARD

Continued from Page 1

spread hate and hit political pressure points across Montana.

Betts opened with a reading from a Jean Valentine poem. He then signed up into reading around 10 of his poems from "Felon" before opening to the audience for questions. "I've had all these different views into the world of criminal justice reform into the world of crime, into the world of prison and into the world of prison and into the world of prison," Betts said.

"I like to think that I'm talking about violence and talking about violence comes a context of intimacy in a context of random violence raises the stakes for what we really mean when we say we want to be merciful or what means when we say what someone actually deserves," Betts said.

Questions for Betts were wide-reaching, and he navigated through them with answers surrounded by tangents and anecdotes. Topics ranged from awards in Unions to Tesla steering wheels.

"That's what MCAS is doing, is to be that entity where anyone who wants to know anything about Islam can come to us," Ahmed-Sherazi said. "We want to educate people, we also want to be educated at the same time."

Both Stromgren and Ahmed-Sherazi work to educate the Spokane community on Muslims and Islamophobia. MCAS has already partnered with many Spokane organizations and works to provide community support such as hiring bowling for Afghan families or providing transportation via Lutheran Community Services. They also have close personal connections to the GU community, with Father Patrick Reinen having aided in a panel on the similarities between Christianity and Islam titled "Muslims/Mary A Woman of Two Traditions.

"I think that literature is kind of the only way we get to know each other independent of the noise of ideology," Betts said. "[Betts] took the time to explain his different uses of different poetic structures to give us an understanding into a world I've never known, the world of prison, it was very eye-opening," Readel said.

Betts spoke to a crowd of more than 100, and the event lasted about 80 minutes.

"Narrative is the likelihood of society," Betts said. "I think that literature is kind of the only way we get to know each other independent of the noise of ideology." Betts concluded with a poem from his most recent poetry collection, "Felon."
If your teen’s age is anywhere between 15 and 19 years old, you might be wondering how to talk to your child about YouTube. While it’s important to have these conversations, it’s also crucial to listen and understand your child’s perspective. Here are some tips on how to have an open and honest conversation about YouTube with your teen:

1. Be approachable: Create a safe and comfortable environment for your child to feel free to express their thoughts and feelings about YouTube.
2. Listen actively: Allow your child to share their views and experiences without interrupting or judging. Show empathy and understanding.
3. Use open-ended questions: Ask questions that encourage your child to reflect on their experiences and discuss their thoughts. For example, “What did you like/dislike about the content you watched?”
4. Stay calm and patient: Be patient with your child if they are hesitant to discuss or share their opinions. Keep the conversation calm and respectful.
5. Share your own perspective: After your child shares their thoughts, share your own insights and concerns. This can help bridge the gap between your perspectives.
6. Respect their boundaries: Give your child space to process the conversation on their own time. Respect their boundaries if they choose not to discuss certain topics.
7. Stay informed: Keep yourself updated on current YouTube trends, content, and policies. This can help you answer your child’s questions and address their concerns effectively.
8. Seek additional resources: If your child’s concerns are complex or difficult to address, consider seeking guidance from counselors or other experts.

Remembering YouTube’s golden age

By ANDRES ESKINDEN

In the 1990s, the internet was in its infancy, and YouTube was not even a glimmer on the horizon. However, the internet was already transforming the way people consumed content and entertainment. From websites like Geocities and Angelfire to the rise of Napster and the MP3 revolution, the internet was becoming a platform for sharing and consuming content. In this essay, I will explore the history of YouTube and its role in the internet’s evolution.

As we know today, YouTube was founded in 2005 by Chad Hurley, Steve Chen, and Jawed Karim. The idea behind YouTube was simple: it was a platform for sharing videos online. Initially, the platform was limited to 10 minutes per video, and users could upload videos of any kind, from music videos to home videos. However, the platform quickly grew in popularity, and by 2006, it had been acquired by Google for $1.65 billion.

The acquisition by Google marked a significant shift in YouTube’s direction. Under Google, YouTube began to focus on monetization, and by 2007, the platform had launched its now-famous AdSense program. This allowed content creators to earn money from the ads placed on their videos, creating a new revenue stream for content creators.

Today, YouTube is the second most popular website in the world, second only to Facebook. It has over 2 billion monthly active users and generates billions of dollars in ad revenue each year. The platform has transformed the way people consume and create content, and it has become a hub for music, news, sports, and education.

In conclusion, YouTube has played a significant role in the internet’s evolution over the past two decades. From its humble beginnings as a video sharing platform to its current status as a giant in the entertainment industry, YouTube has changed the way we consume and create content. As we look to the future, it will be interesting to see what new directions YouTube will take and how it will continue to shape the internet’s evolution.
GU theatre department dreams up a Mardi Gras ‘Midsummer Night's Dream'
Come grab a slice at these local favorite pizza spots

**commentary by Ava Prunier Herman**

Pizza is a favorite go-to meal for many. Spokane’s food scene puts pizza high up on its list. Here are some go-to spots that are a must when just having one slice or an entire pie.

**Wooden City Spokane:**
Situated in the Audubon neighborhood, Wooden City Spokane is known for its artisinal pizzas with a charred crust. They have staple ultra-thin crust artisan pizzas. Since 2014, they have expanded their menu to include a mobile cart into a fully functioning kitchen. Their developers in the Kendall Yards district to turn their pizza production company when he was 15, and has since gathered a lot of support and interest in the product, Lukens. He said he wouldn’t be here without his faculty and his peers.

**Versalia Pizza:**
Located in the Kendall Yards neighborhood, Versalia Pizza makes pizza from scratch. They compete for cash prizes in three business categories — technology, technology, and apparel, and this competition helped him bring it to life. He said he wouldn’t be here without his friends. Versalia Pizza won the highest prize of $10,000.

**Flying Goat, Republic Pi and Iron Brewery:**
Flying Goat is known for its ultra-thin crust artisan pizzas. Since 2014, they have expanded their menu to include a mobile cart into a fully functioning kitchen. Their developers in the Kendall Yards district to turn their pizza production company when he was 15, and has since gathered a lot of support and interest in the product, Lukens. He said he wouldn’t be here without his faculty and his peers.

S
ince the moment she first held a basketball, Brynna Maxwell, pursuit
of the game.
by SyDney FLuKER

I'm just trying to use that to the best of my
ability to glorify Him and give it back to
Him, and that gives me a love for the game.
According to Maxwell, she loved her
time at Utah and would change nothing
about her time there. She entered the
transfer portal when she graduated a year
early, knowing that she wanted to keep
her high work ethic and competitive
energy. With her time at GU, she hopes to
evolve into the best player she can be.

“I feel His presence when I play. ”
Maxwell said.

According to Maxwell, she loved her
moments I live for, it's why I love playing
basketball.

"Brynna is probably our best shooter, ”
Fortier said.

While she’s practiced with the Zags for
less than a couple of weeks, Maxwell has enjoyed
the time at GU and would change nothing about
her time there. She entered the
transfer portal when she graduated a year
earlier, knowing that she wanted to keep
her high work ethic and competitive
energy. With her time at GU, she hopes to
evolve into the best player she can be.

“I know we can go pretty far,” Maxwell said.

As a player, Maxwell wants to maintain
her high work ethic and competitive
energy. With her time at GU, she hopes to
prove to the best player she can be.

"They're going to impact our team,
and we're going to make them work,”
Maxwell said.

"I'm a Christian and I believe that God
gave me a gift to shoot the basketball and
I'm just trying to use that to the best of my
ability to glorify Him and give it back to
Him, and that gives me a love for the game.
According to Maxwell, she loved her
time at Utah and would change nothing

CASEY CLINGER

The Gonzaga University men’s cross-country team finished second at the West Coast Conference (WCC) Championship meet at Washington State University on Saturday. With 81 points, the Zags fell just behind BYU, who had 70 points, and ahead of San Francisco, who had 114 points.

The women’s team came in fourth place, finishing with 121 points. Behind BYU, which had 53 points, and Portland, who had 108 points, the Zags finished just ahead of Santa Clara (118 points). BYU and Santa Clara were dominant, with five of the top six finishes going to the Cougars and only 19 seconds separating the top six runners.

Kurt Garcia, along with his teammate Logan McEachern, were the only Zags to make the top 20 finishes. Garcia led the Zags into second against Portland.

“Behind Smith was Guermali in 15th (22.42.7), Mwaura in 18th (22.50.3) and Kyle Radosevich in 20th (22.51.9) to place five Zags in the top 20. Radosevich said, “All those guys can race better and I feel like that’s kind of a testament to who we are as a team. If we put everything on the line, we’re capable of doing that.”

The Zags will lace up their spikes and toe the line next at the NCAA West Regionals in Tacoma, Washington on Nov. 12. The top two teams in each regional race automatically qualify for the NCAA Championships in Stillwater, Oklahoma on Dec. 3.

The Zags will need a better showing at regionals should they hope to qualify for the National Championship meet for a second straight season. Men’s field placed third last season to place GUI.

“Definitely any time you have, and it’s always good to make the most of it. I’m just glad we’re going to have the opportunity to race on the same course that we raced on last year,” said Radosevich.

The Zags will need to bring their best to the regional meet to have a chance of making it to nationals.

The Zags are aiming for a top five finish at the regional meet and a top 25 finish at nationals. A top 25 finish at nationals would qualify them for the national meet.

“Just looking to run well, that’s the goal,” said Radosevich. “We’ve had some great performances in the past, so we’re hoping for another good showing.”

The Zags will need to run well to have a chance of making it to nationals. A top 25 finish at nationals would qualify them for the national meet.
